- 25X1 1. The Manfred Weiss aluminum foundry has not been in use since 1945. The machines will soon be transported to Felsógalla, where they will increase the capacity of the factory there by 1,500 tons per annum.
- 25X1 2. The Manfred Weiss rolling mills are in first-class condition. The capacity of production for aluminum strips, pipes, bars, and wire is 200 tons per month. If foreign markets were able to pay the Hungarian aluminum price the rolling capacity could easily be doubled.
- 25X1 3. The production of aluminum sheets amounts in the summer months to about 3,000 kilograms, the same amount Hungary is committed to import. Hungary intends to acquire machinery for the increase of sheet production but the delivery time for these machines is about two years.
